

# What is new in Survey123 and QuickCapture for ArcGIS

Ismael Chivite

Esri

---

## Abstract

Join this session to learn what is new with Survey123 and QuickCapture. For Survey123, we will describe how you can now work with polygons and polylines and configure your maps using mobile map packages and web maps. We will also describe how Survey123 can work with high accuracy GPS receivers and integrate with external enterprise systems. In this session we will also demonstrate how you can create your own QuickCapture projects to enable rapid data collection in the field.
